

Safety in the Sky

2.5 million

flights occur before an accident

Accidents per Million Flights

1970: 6.5

2020: 0.4

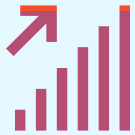

Cargo flights
comprise

32%

of all accidents. These
don't involve passengers.

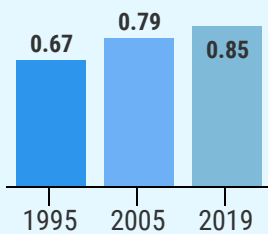

Safety Improves

as **Global Flights** Increase
from **22B** in 2000
to **37B** in 2019

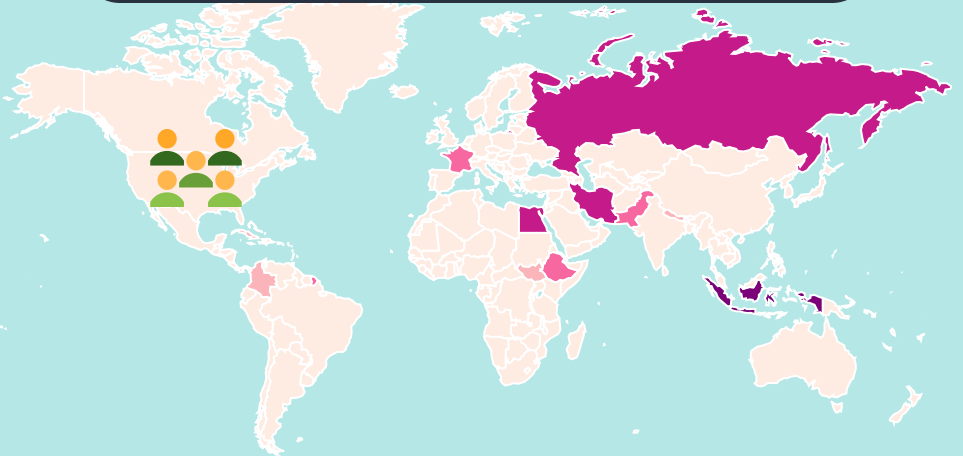

Safety Improves

despite increases in **Capacity per Flight**

98%

of fatalities occur **OUTSIDE** the
United States

Individuals per km

< 65

65 - 131

131 - 196

196 - 262

> 262

Airports and airlines are here to keep you safe....

Only 42 fatalities
since 2016

much less than the **37,000** car
fatalities **per year**
